ENERGY MANAGEMENT
ENERGY USE:

NEW
&
ENLARGE USE OF
EXISTING
[energy
units]

HOW DID YOU
MAKE IT HAPPEN?

↳ citizens were motivated
& saw their chance

↳ **QUICK RESULTS!**

- ① CITIZENS / HOUSEHOLDS TRAININGS
- ② ENERGY SAVING CENTRES For Everyone
- ③ PUBLIC LIGHTING SYSTEM

↳ **USE OF RENEWABLES!**

↳ **ENERGY UNITS:** Identify task & give power
[climate change unit*]
in Germany?

↳ **RAISE AWARENESS!**

ABOUT CITIENGOV

CitiEnGov aims at improving the capacity of Central Europe Public Administrations to implement new energy planning strategies through the setting up of new Energy Units or the enhancement of those already existing.

Furthermore, CitiEnGov promotes an integrated approach to implement cross-cutting energy plans, new SECAP elaboration, SEAP monitoring and implementation, energy-related data management and new energy data integration, incentives and pilot actions to improve the adoption of energy efficiency solutions at local and regional level.

3 PILOT ACTIONS IMPLEMENTED

Within the project 3 pilots action have been realized:

1. **Eco-Citizen Programme** - domestic behavioural change in energy consumption in Ferrara (IT), Ludwigsburg (D) and Hajdú-Bihar County (HU)
2. **Design and Launch of a One Stop Shop Energy Service Centre** in Weiz (AT), Bydgoszcz and Grodzisk Mazowiecki (PL)
3. **Green Public Lighting System** in Split (HR)

WHAT ARE THE OBJECTIVES OF THE 3 PILOT ACTIONS?

- raising awareness of citizens about energy efficiency issues
- supporting Energy Units and give advisory services on RES and EE solutions
- improving the sustainable urban public lighting management
- promoting innovative solutions to enhance energy efficiency at urban level

Ferrara, Italy

Ludwigsburg, Germany

Debrecen, Hungary

1 ECO-CITIZENS PROGRAMME

The Eco-Citizens Programme aims at actively involving households, raising awareness about domestic behavioural changes towards energy efficiency and RES use. By means of thematic events, workshops and tailor-made consultancy services, citizens have reduced the energy consumption and decreased domestic energy costs.

Overall here are the figures at project level:

- 3 cities involved (Ferrara, Ludwigsburg, Hajdú-Bihar County)
- 50 families (30 in Italy, 10 in Germany, 10 in Hungary)
- 20 seminars organized for citizens about domestic behavioural change
- 5% average energy saved for all the households involved in the Programme

Grodzisk Mazowiecki, Poland

Bydgoszcz, Poland

Weiz, Austria

2 DESIGN AND LAUNCH OF A ONE STOP SHOP ENERGY SERVICE CENTRE IN AUSTRIA AND POLAND

The One Stop Shop Energy Centre in Weiz (AT), Bydgoszcz and Grodzisk Mazowiecki (PL) is a single service where all the stakeholders can approach public administrations with all energy-related issues.

The activities of the One Stop Shop Energy Centre in the 3 cities are the following:

- information (about policies, initiatives, step-by-step assistance about energy related issues)
- education of citizens about the importance of EE and RES
- demonstration of EE and RES solutions
- consultations for citizens and stakeholders
- initiation of local and regional initiatives for new EE and RES solutions

Split, Croatia

3 GREEN PUBLIC LIGHTING SYSTEM IN CROATIA

A Pilot Action for the modernization of public lighting (Green Public Lighting System) has been implemented in the city of Split (HR) based on Smart City solutions.

This project enables the City of Split to promote energy efficiency and renewable energy sources as a step towards more efficient management of energy resources at urban level.

It also contributes to achieve the energy savings targets set by the City Council.

Results achieved:

- 18.000 square meters covered with new smart lighting
- 80% of energy savings
- reduction of 11.5 tons of CO² per year
