Summary

Within the CEUP2030 Project, the Project Partners were requested to reach all together 20 presentations/panel discussions on complementary public events. The total number was originally requested as 2 such appearances/ PP (10*2).

In the beginning of the project- 2020 March- the Partners agreed upon the requirements, and since then they have been continuously contributing to this deliverable. PBN as WPC Leader was also continuously monitoring PPs' input and in case some information/evidence might have missed they asked those from the respective PP. PBN also informed the Partners of the updates of this deliverable on every periodic Project Meeting.

By the end of the project, (04/2022) Partners fulfilled, and even overfulfilled the requested quantification target. All in all, PPs have **reached 24 presentations on complementary public** events. Every PP has contributed, but the distribution of contribution was not equal.

Clarification, and common agreement of the deliverable: In case PPs held a presentation on a complementary=thematically related project event (e.g: S3HubsinCE) where the topic was similar to CEUP, and CEUP appeared somehow (with logo in the ppt, and/or presenting the thematic activities of CEUP..) in their presentation, they could be counted as an excellent indicator here.

Table 1 summarises PPs' contributions to this deliverable in the entire project lifetime.

Regional Networking Event

March 26, 2021 | Virtual event

About of the event:

The main objective of the two-day networking event is to empower BSOs as service providers by presenting them with modes and approaches for strengthening their role among their members. The event is envisaged to connect the local BSOs with similar developed organizations from different countries in the region of Western Balkan and Europe in a mode of peer-to-peer learning.

The event will include panel discussion and good practices presentations from BSOs form the region and Europe. will take a form of BSO to BSO meetings in order to network and share information and resources. Recommendations deriving from best practices by additional countries for support by the governments will be developed. It is expected that the event and established contacts will enable and stimulate BSOs to become members of wide regional or European networks of similar BSOs, exchange of practices, joint project applications etc.

Specific topics to be covered and their timing are provided in the Agenda below.
Language: The working language of the workshop is Macedonian.
Dress code: Business Casual.
