Interreg KETGATE

# KETGATE

Your transnational GATE to Key Enabling Technologies in Central Europe

# What are Key Enabling Technologies (KETs)?

KETs are a group six technologies, which are drivers of innovation in all industrial sectors. These technologies are:

Nanotechnology

Micro- and Nanoelectronics

Photonics

Advanced Materials

Industrial Biotechnology

Advanced Manufacturing Technologies

The goal of KETGATE is to facilitate the transnational access of KETs for small and medium-sized enterprises (SMEs) in Central Europe. Thereby, increasing their innovation capacity and their competitiveness.

## KETGATE Points

Services for Small and Medium Enterprises (SMEs)

KETGATE provides you quick and easy access to a network of dozens of experts bringing you innovative technological solutions for your specific needs. We offer you support on:

Evaluating the Innovation capacity of your company

Facilitating your cooperation with RTOS
