

JAČANJE KAPACITETA
UPRAVLJANJA OKOLIŠEM ZA
ODRŽIVO KORIŠTENJE PRIRODNE
BAŠTINE TOPLICA U GRADOVIMA
I REGIJAMA SREDIŠNJE EUROPE
KAO POKRETAČ LOKALNOG I
REGIONALNOG RAZVOJA

ŠTO RADIMO

Healing Places namjerava pružiti podršku u održivom razvoju toplica istovremeno štiteći jedinstvene prirodne resurse na kojima se temelje. Partneri surađuju kako bi proširili znanje i svijest o utjecaju različitih čimbenika na izvore mineralne i termalne vode i izgradnji modela upravljanja na više razina i više državnih područja kako bi ojačali upravljanje nad vrijednim prirodnim izvorima ljekovite vode.

TKO SMO

Partneri iz sedam zemalja središnje Europe udružili su snage kako bi poboljšali integriranje kapaciteta za upravljanje okolišem radi zaštite i održivoga korištenja prirodne baštine i izvora.

Kroz suradnju partnera koji predstavljaju različite razine i sektore, široko primjenjive metodologije i lekcije naučene iz nekoliko pilot aktivnosti osnažit će pitanja zaštite okoliša tijekom intervencija u toplicama i pružiti podršku uspješnom rješavanju konflikata među gospodarskim, društvenim i okolišnim aspektima.

Tko nas financira

Naš projekt financira program Interreg Središnja Europa koji potiče suradnju u zajedničkim izazovima u središnjoj Europi. S 246 milijuna eura iz Europskog fonda za regionalni razvoj, program pruža podršku institucijama za prekograničnu suradnju kako bi unaprijedili gradove i regije u Austriji, Hrvatskoj, Češkoj, Njemačkoj, Mađarskoj, Italiji, Poljskoj, Slovačkoj i Sloveniji.

Outputs planned until March 2022

04.2019 - 03.2022

Project duration

Outputs

The well-structured process to achieve project goals is based upon the development of common tools for an integrated assessment of existing as well as future threats and pressures on mineral and thermal water resources in SPAs across Central Europe.

Proceeding step-by-step, pilot actions will support the practical implementation of sustainable thermal water use in SPA, understood primarily as ensuring effective and rational use of identified resources and protection of ecosystems while realizing social and economic functions.

The pilot action experiences are planned to affect the jointly formulated strategy for sustainable SPA management.

As a final joint action, partners establish a shared Integrated Strategy for sustainable management of SPAs natural resources, building on tools application and pilot actions results, which bring practical elements for Integrated Strategy development.

STRATEGIES AND HANDBOOK

Integrated Strategy for sustainable management of SPAs natural resources

One common Integrated Strategy will be compiled focusing on how to improve sustainable management capacities of Central European SPAs, including innovative and responsive decision making processes built upon partnerships between local and regional authorities, thermal business sector, environment and health management organisations.

Additionally, transnational Handbook on best practices in environmental and socio-economic pressures mitigation and conflict solving will be developed.

03.2022

TRAINING

Transregional and cross-sectoral capacity building by trainings

Specific partners' expertise will be shared during training activities with the aim of improving understandings and technical skills with regards to HealingPlaces tools.

This output is intended to act as key-factor for solid and collective contributions from all partners.

This approach will result in much stronger capacity building within the partnership and beyond through multiplying activities along the stakeholder groups.

11.2020

TOOLS

GIS Internet based tool and tool for integrated assessment

GIS Internet based tool with spatial database on mineral and thermal water resources in partner countries will be constructed and disseminated. It will include also the data acquisition tool on mineral and thermal water resources.

The tool for an automatic impact assessment and assessment of environmental capacity in scenarios of further development of SPAs will be designed and tested as a support for sustainable management of mineral and thermal water resources.

01.2022

PILOT ACTIONS

8 pilot actions supported by an Expert Panel

Different themes are concerned by pilot actions:

- environmental assessment of thermal water sources
- development of tools supporting environmental impact analysis and implementation of product environmental footprint method in SME
- preparation of plans contributing to regional water ecosystems protection and management policies
- creation of a partnership and dialogue platform for the sustainable use of water in the SPA through social participation and task force work
- strengthening the awareness of SPA users (patients and tourists) in the field of environmental protection and sustainable use of SPA resources
