AND ENERGY

Nature under pressure

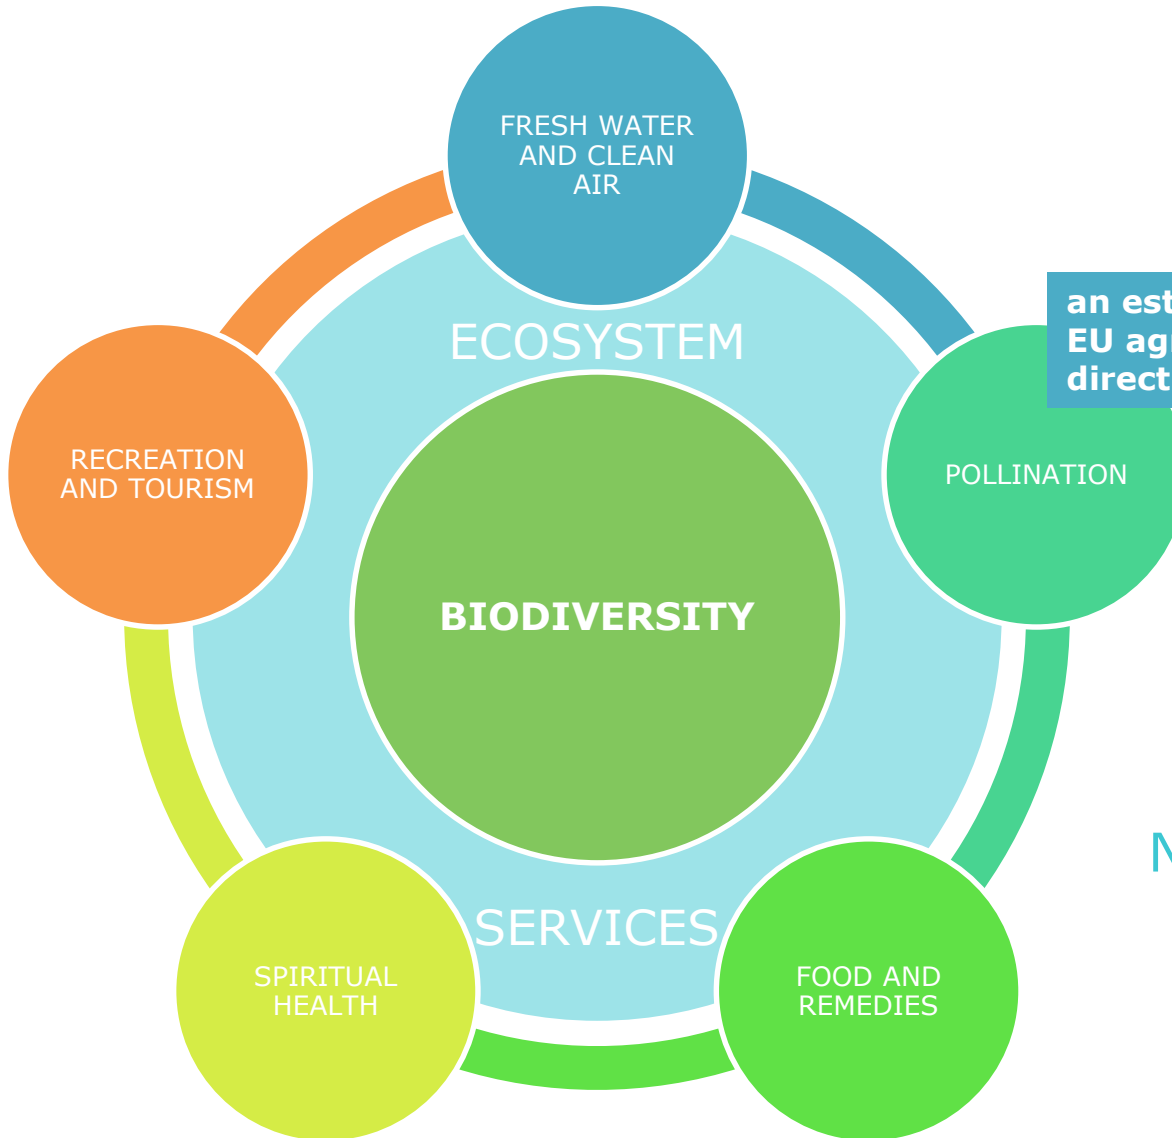

„Loving it to death“

CEETO Conference on Protected Areas & Sustainable Tourism

22 to 24 October 2018, Opatija, Croatia

Igor Kreitmeyer, Assistant Minister, Ministry of Environment and Energy

Nature's benefits to people

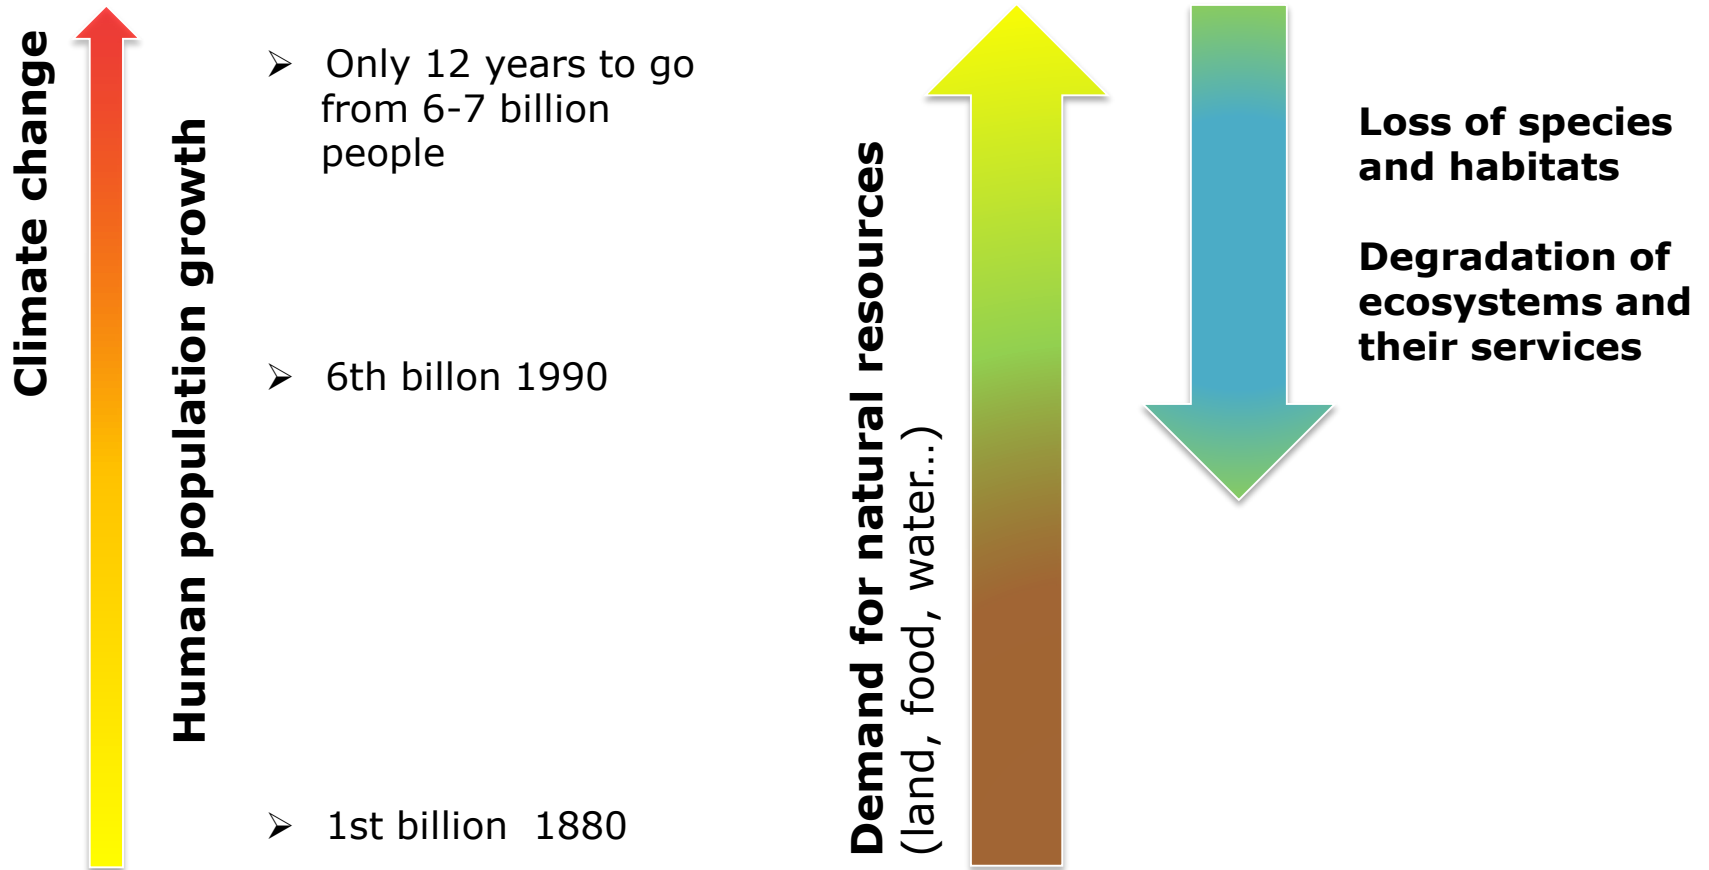

an estimated EUR 15 billion of annual EU agricultural output is directly attributed to pollinators

- NUTRIENT CYCLING
- PROTECTION FROM NATURAL DISASTERS
- PEST AND DISEASE MANAGEMENT
- EROSION PREVENTION
- CARBON SEQUESTRATION

...

Biodiversity under pressure

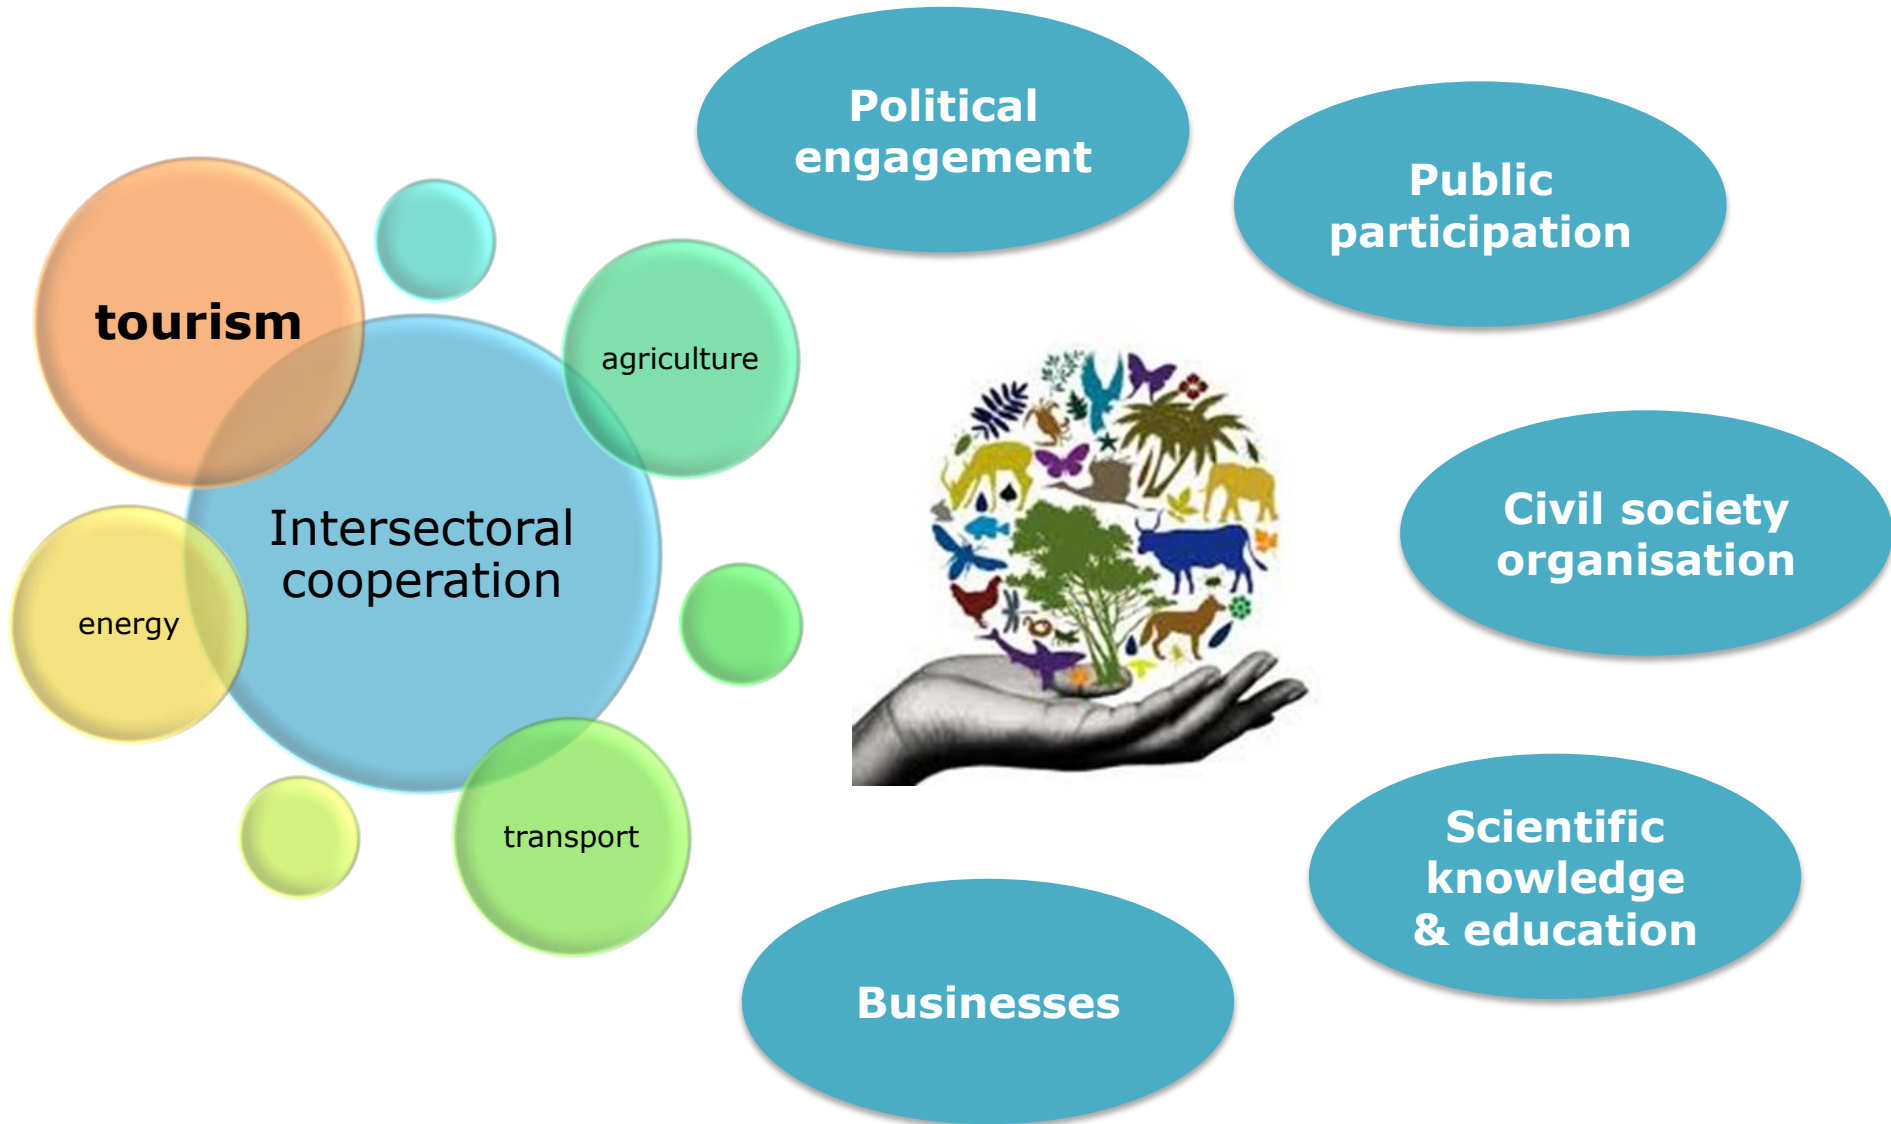

Are we ready for transformational change?

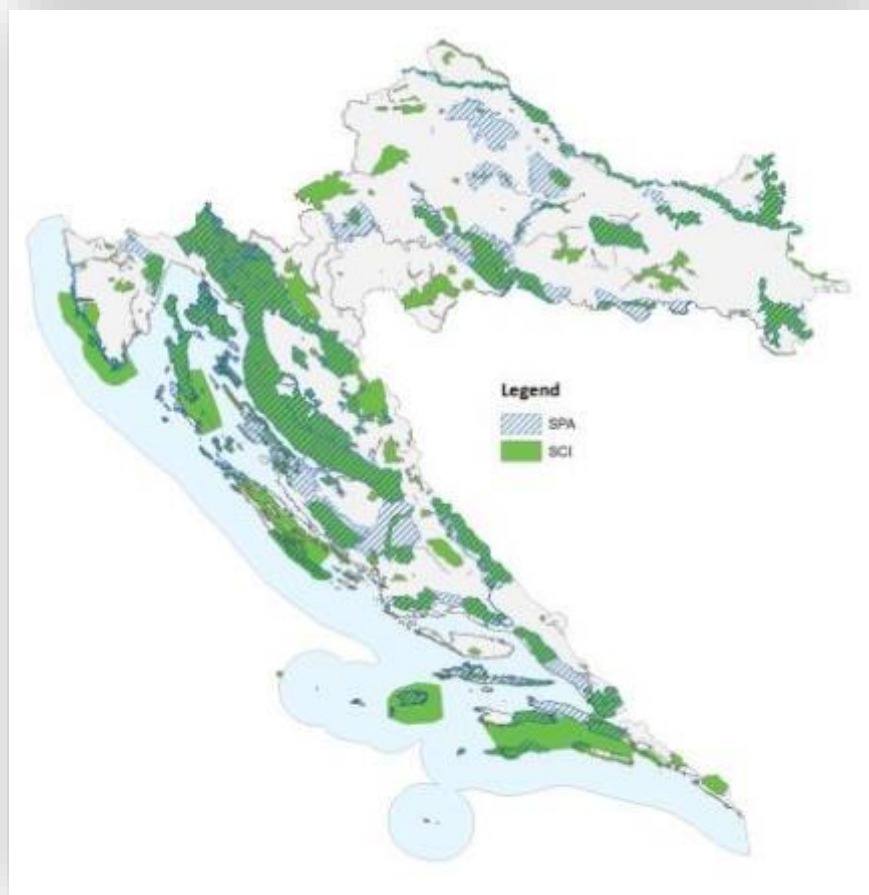

in the **use** and
management
of biodiversity
and
ecosystems

changes in
our **behavior**
and
decision-
making at all
levels

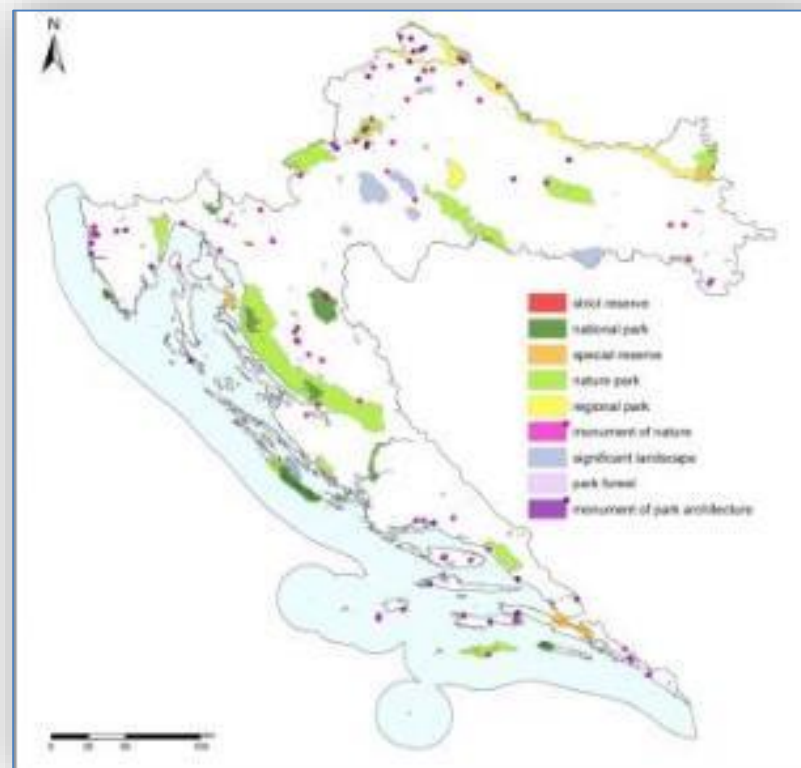

Transformational change at every level

Croatia – Natura 2000 and PA´s

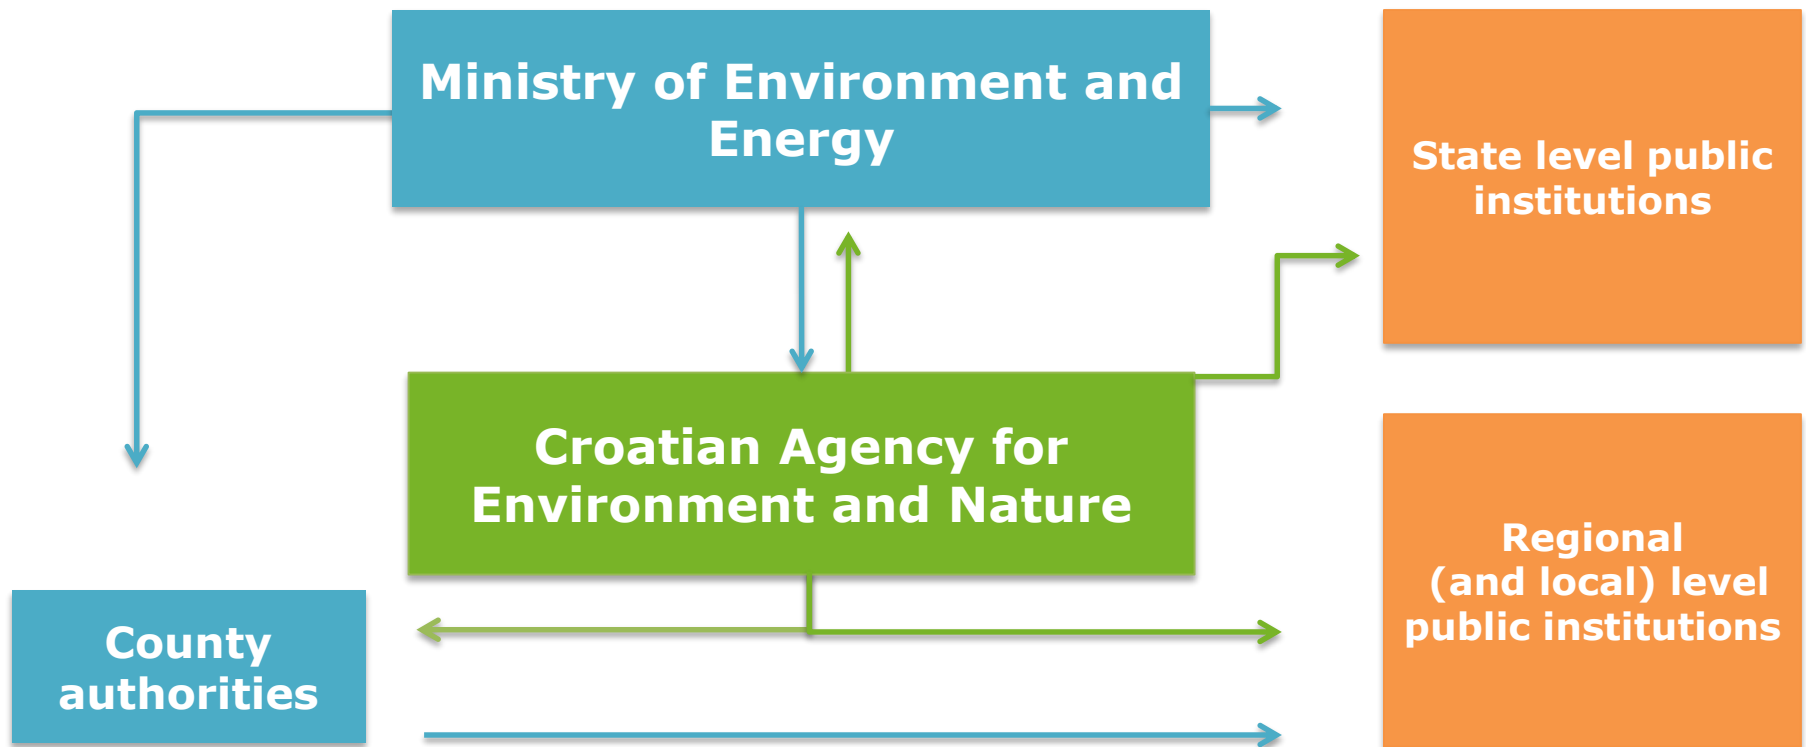

Natura 2000 = 37% land, 15% sea
2nd largest in the EU

- **408** Protected Areas
- **8** national parks
- **11** nature parks

Institutional framework

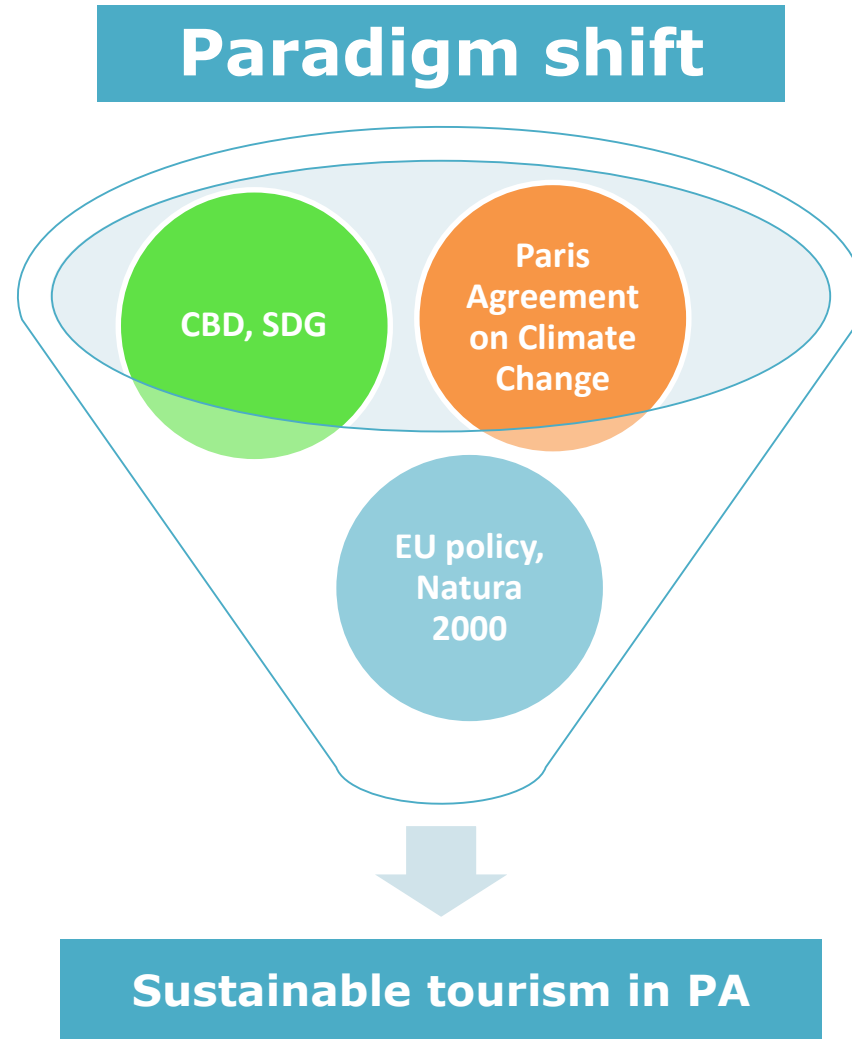

Where were we 10 years ago?

In 2010 analysis rated low:

- A) Insufficient visitor infrastructure
- B) Tourism impact monitoring in PA's
- C) Stakeholder's involvement
- D) Knowledge of tourism management
- E) Promotional / marketing activities
- F) Inadequate visual identity
- G) Inadequate funding (decreasing state budget funding)

(reference: NIP and PARCS projects 2011-2017 - MEE)

Where are we going?

Types of tourism in PA's

TOURISM

Sports/Recreation – cycling, trekking etc.

Green; Educational; Rural /Ethno Cultural; Nautical; Congress (smaller scale)

VISITORS

- Middle age, educated, travelling with family and friends
- Want to experience nature, spend time with family, do recreation activities
- mostly half-day visitors

Present tourism numbers

- Croatia 2017 - **17,4 million** tourists
- July/August - **8,5 million** tourists

> **4 million** visitors in 19 national and nature parks → **1/4 of all visitors actually visit some of 19 national and nature parks!**

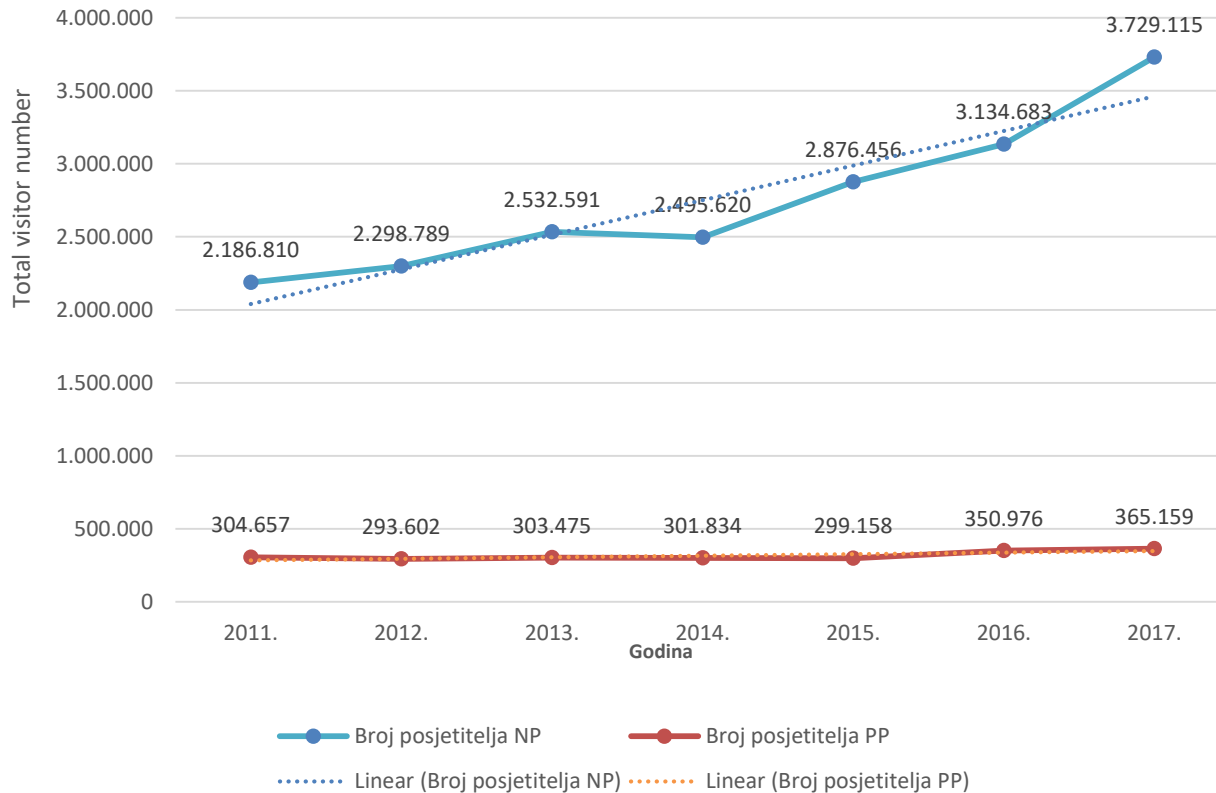

„Tourism exploitation" varies – most of the parks have not yet reached their potential **BUT...**

> **3 million** visitors in NP "Plitvice lakes" and NP "Krka"!

Tourism numbers increase

Comparison of total visitor number in National and Nature Parks
2011. - 2017.

- **96,6% foreign visitors** in National Parks
- **80 % domestic visitors** in Nature Parks

NP Krka example

NUMBER OF VISITORS in NP KRKA
2017 - October 2018

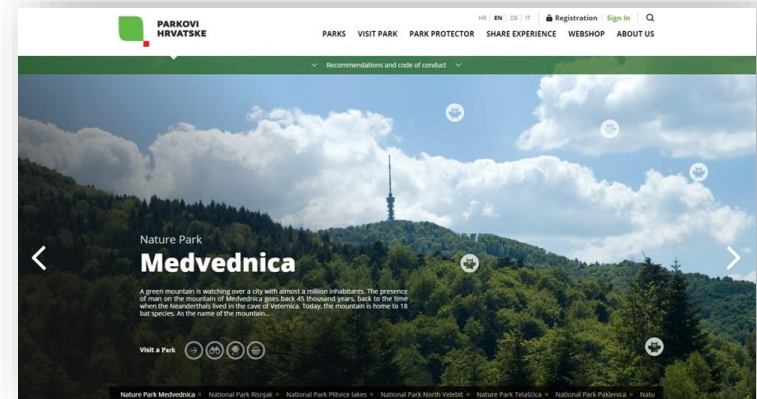

TOTALY	
2017	1.244.558
2018	1.302.154
2018 vs 2017	5%

■ 2017 year
■ 2018 year

Making Nature more visible and accessible

brand
„Parks of Croatia“

webportal/web shop
„Parks of Croatia“

- **Standardization** and networking of all 19 PA's
- **Tourist signalization** of Parks on motorways

PARKOVI Parks
HRVATSKE of Croatia

www.parkovihrvatske.hr

Visitor infrastructure projects

NP Lastovo archipelago
Visitor centre „Vejo more”

NP Krka Puljane

NP Krka „Centar Lozovac”

NP Kopački rit (Castle Tikveš; Sakadaš Lake)

Monitoring of tourism impact in PAs

Visitor Management Plans under development (condition for EU infrastructure projects)

- Training „**Visitor management planning in PA's – LAC methodological framework**”
- **LAC methodology** - defining **indicators** for **biophysical** and **social impacts of visitor use**
- **Setting standards** –deciding what levels of impact are acceptable
- **Relevant stakeholders** included

Sustainability in PAs

Involvement of stakeholders in PA management

-cooperation councils or similar mechanisms

(Stakeholder Forums; Charter for sustainable tourism; Plan for sustainable tourism)

- enable entities that are neither owners nor rights holders to assume care for protected areas

Nature and people together

Nature for People

opportunity to put ecological agriculture and farms at the centre of sustainable tourism development

People for Nature

Abandonment of agricultural areas and activities → disappearance of meadows and orchards (overgrowth), changes in landscape
Extensive agriculture (agri-environment measures) → variety of landscapes, wealth of species

Need for continuous education of:

PA practitioners, authorities (national, regional, local), Stakeholders, service providers, local community

Pressures and sustainability

„Don't wait in line ... buy online”

IPAK JE GUŽVA?

IMAMO NEKOLIKO PRIJEDLOGA ZA VAS. SAMO TREBATE ODLUČITI

Visitor education and interpretation

Continuous **Visitor structure and attitudes research** needed
Increase PA's **capacity to respond** to emerging trends adaptively

- Educational programs
- Interpretative/guided walks
- Manifestations (EU Bat Night, Earth Day, Week of Parks, etc.)

How to know if tourism is sustainable?

- Every **stakeholder** involved in PA's tourism needs to be **sustainable**
- Sustainability in PA's won't be achieved without measuring indicators
- Many Quality Labels developed (EU, national level, etc.)
- **There is a gap – Nature is „hidden“ under Environment**
- **Nature should be emphasized in the indicators defined in existing Quality Labels**
