

SOMOGY COUNTY

Hungary (county level)

1. NEED

The prevention and treatment of cardiovascular diseases needs complex risk factor specification and analysis involving several different medical experts

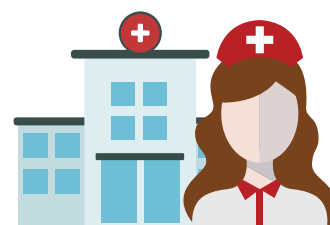

2. SOLUTION

A new, patient focused system in county hospital's general medicine department

3. INNOVATION

The patients will be examined by a specialist team, doctors create real-time diagnoses, and treatment decisions along the common treatment protocol

4. BENEFITS

Shortening patient pathways, increasing the role and efficiency of prevention as well as cost-efficient patient monitoring
