

REGION PIEDMONT

Italy (regional level)

1. NEED

Recover, enhance and reduce costs of regional real estate properties in order to return them to the citizens and strengthening the liaisons between Piedmont regional institution and local communities

3. INNOVATION

Integration of different eco-friendly aspects such as energy efficiency solutions, technical design of the innovative energy system taking into account the natural energy flows and their mutual interactions

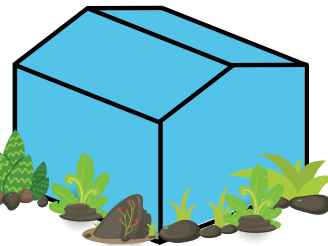

Interreg
CENTRAL EUROPE

PPI2Innovate

European Union
European Regional
Development Fund

2. SOLUTION

For the identified asset (Botanical Garden), create a self-sufficient energy system based on natural resources and strengthen its Education and Research vocation

4. BENEFITS

Self-sufficient energy system based on natural resources with significant reduction of the Botanic Garden's utilities costs (electricity, water, heat...); full and safe access for visitors to the Garden
