

October 2019

WHAT IS PROSPECT2030?

We think good governance is the key driver to unlock the energy transition towards a low-carbon economy. We need to increase the capacity of involved regions in using public funds in a more innovative and effective way.

WHERE DO WE COME FROM?

Check out our team:

WHAT WE'RE WORKING ON

As a first step we're running an assessment of the use of available public funds for low-carbon investment over the 2014-2020 period.

We will find out what was the amount of available funds in the target regions and how they have been used.

COMMUNICATION SEMINAR BY THE RIVER

We've been to Budapest on 9-10 September to attend a full-immersion in story-telling. Here you can find out who invited us and what we've learnt:
