

REPORT ON THE ESTABLISHMENT OF A MARKET PLAYER WORKING GROUP FOR EACH PILOT ACTION

Work paper

**Version
1.0
09.2019**

1) Introduction

The pilot project include elaboration of documentation for connecting Ljubljana-Kocevje railway line and car logistics centre Grosuplje via industrial side track: preparation of documentation/design for constructing of track and missing link between private and public part of rail infrastructure.

When constructed (not a part of the pilot) the road-rail will enable a mass shifting of freight transport (cars) from road to rail. Railway Line Ljubljana Kočevje is a regional line connecting TEN-T corridor through Ljubljana with big potential for new freight traffic.

For achieving the results stakeholders and market players inclusion is very important and they will be involved throughout the whole pilot activity process.

2) Stakeholder description

The stakeholders involved in the pilot activity and participating in the market player working group are presented in the table below:

Name	Public/ private	Category (eg.: local/regional/national public administration, railway infrastructure manager, industry, logistics operators, railway undertakings, etc.)	Reason for involving this stakeholder with respect to the pilot action	Expected contribution	Relevance for the pilot action (low/medium /high)
Local industry/Local logistics centre	Private	Logistics operators	End user	Provide needs, data on market potential for	high

				shifting freight from road to rail	
Local municipalities	Public	Local administration	To approve documents, if necessary	To approve changes of local spatial and transport plans, if necessary	high
Rail transport operators	Private/public	Railway undertaking	Cooperation as potential carrier	Express interest for future cooperation, provide info on capacities for market potential	medium
Ministry of infrastructure and its departments	Public	National public administration	To revise and approve technical documents	To revise approve technical documents for connecting private and public rail infrastructure	high
Infrastructure manager	Public	Railway infrastructure manager	Cooperate in confirming the documents	Confirming the documents for connecting private and public rail infrastructure	medium
Development institutions at local or regional level	Public/private	Other	Project promotion, provide opinions	Project promotion, provide opinions	low

3) Establishment of a Market Player Working Group

Market player group will be established in autumn 2020. There were already some meetings held with important stakeholders in order to get inputs necessary for a tender for pilot documentation.

More intense meeting are planned during elaboration of pilot documentation, its revision and approval.
