

# 3<sup>RD</sup> TRAINING ON MANAGEMENT PLAN DEVELOPMENT

## Output factsheet: Trainings

Project index number and acronym	CE32 AMIIGA
Lead partner	Central Mining Institute
Output number and title	O.T.3.2 Training of practitioners
Responsible partner (PP name and number)	Landeshauptstadt Stuttgart PP3
Project website	<a href="http://interreg-central.eu/Content.Node/AMIIGA.html">http://interreg-central.eu/Content.Node/AMIIGA.html</a>
Delivery date	08.2019

### Summary description of the implemented training measure(s), explaining the specific goal(s) and target groups

3<sup>rd</sup> regular training on Management plan development was held on 26. September 2018 in Ljubljana, Italy. Altogether 30 representatives of each partner and several associated partners were trained.

Effective training activities were conducted in order to provide the necessary information and to engage actively participants in the training. Firstly, a trainer demonstrated his expertise in management plan development, provided information about the work plan, proposed the contents of the final products: Good practice report and Management strategy. Secondly, the participants were asked to discuss the proposal based on their own gained knowledge and experiences in pilot areas. The crucial task was to summarize the experiences on: (i) Regional Implementation Groups and their decision process, (ii) achieved benefits during AMIIGA project, (iii) problems and obstacles occurred in the process of establishing Management plans, ways of solution / success, (iv) essential recommendations and (v) specific experiences. The discussion allowed interaction with other participants that has resulted in the transnational experience and knowledge exchange.

The project and associated partners were targeted groups involved in the training, since they are responsible for the development and application of the management plan.

### NUTS region(s) where training(s) have been conducted (relevant NUTS level)

PL22A, Katowicki; PL22B, Sosnowiecki  
DE111, Stuttgart, Stadtkreis  
CZ052, Kralovehradecky kraj; CZ051, Liberecky kraj  
ITC4C, Milano; ITH52, Parma  
SI021, Osrednjeslovenska  
HR04, Kontinentalna Hrvatska; HR033, Zadarska zupanija

### Expected impact and benefits of the trainings for the concerned territories and target groups

The final documents Good practice report and Management strategy should reflect the experiences in each region and will be disseminated to each region. Therefore, it was necessary that all participants agree on the content of the final documents.

Despite the wide variety of situations there are specific similarities concerning essential challenges and obstacles. Reflecting these challenges in a common discussion enabled the partners to learn from each other and facilitates the further working process.

### Sustainability of the training(s) and developed training material(s) and their transferability to other territories and stakeholders

There is no general way to proceed in establishing a groundwater Management plan. This is a clear result of the AMIIGA project.

Seven specific, individual approaches are documented. They show seven different framework conditions concerning legal framework, state of knowledge, geology, contamination, etc. but also similarities in upcoming problems and a description of specific ways how they were tackled.

Due to this variety of conditions and approaches, AMIIGA results serve as a valuable best practice example for many other European municipalities.

### Lessons learned from the development and implementation of training measures and added value of transnational cooperation

Applied training measures were very efficient and successful in reaching the set goals of this training. Combined measures of lecture style and interactive approach gave satisfactory results. The participants covering seven pilot areas and originating from six European countries were discussing jointly suggesting solutions. The participants exchanged experiences from different regions and countries, which will improve their working process in future.
